

Economics

Topic 6

GLOBALISATION

learning goals

Students will be successful if they can apply their knowledge and reach a conclusion about whether globalisation has been positive or negative for Australia.

- Students will continue to explore globalisation and learn how Australia participates in the global economy.

success criteria

lesson outline

01

Reflection Activity: Examine your purchases!

02

Case Study: The Australian Car Industry

03

What are the positives and negatives of globalisation for the Australian Economy?

Think about the goods and services you buy regularly. Which are produced locally and which are imported? What conclusions can you draw about the influence of globalisation on the Australian economy? Is there a common theme you can see about where everyone purchases their goods from?

Reflection Activity

#1

Case Study: The Australian Car Industry

#2

Explore the case study "Globalisation of the Car Industry". Then, critically read article "Collapse of the Australian Car Manufacturing Industry".

Do you agree or disagree with the view that globalisation has negatively impacted Australia? Give reasons for your answer. Remember you can explore other industries that Australia participates in globally, for example Mining.

Your response should be approximately 250-300 words

Research the Positives and Negatives of Globalisation for Australia.
